Tall Bearded (TB) ha	ave stalks v	vith a heig	ht of 27 1	L/2 inches a	nd above, with	branching	and many b	uds. Each	stalk, in itself, mal	kes a stately	
arrangement in the ga	irden or in	a vase. In a	addition t	to a wide va	ariety of colors	and patter	ns, the TBs d	lisplay oth	er qualities (such a	as ruffling ar	nd lacing)
more frequently than	do the oth	er classes.

Standard Dwarf Bearded	I (SDB) -	some of t	the most	useful gard	len plants, ran	ging in heigl	nt from 8 in	ches to 1	6 inches. They begi	n their bloo	m as the
MDBs are ending, still qu	ite early	y in the iris	season.	They are be	est displayed in	l clumps wh	ere they giv	e the effe	ect of a "cushion" o	f individual l	olooms.
The colors are nearly unl	imited s	ince the SI	OBs show	all the diff	erent "spot pa	tterns" of th	ne miniature	es, as well	as the plicatas and	pinks seen	in the TBs.
